WARRANTY

PATENTED

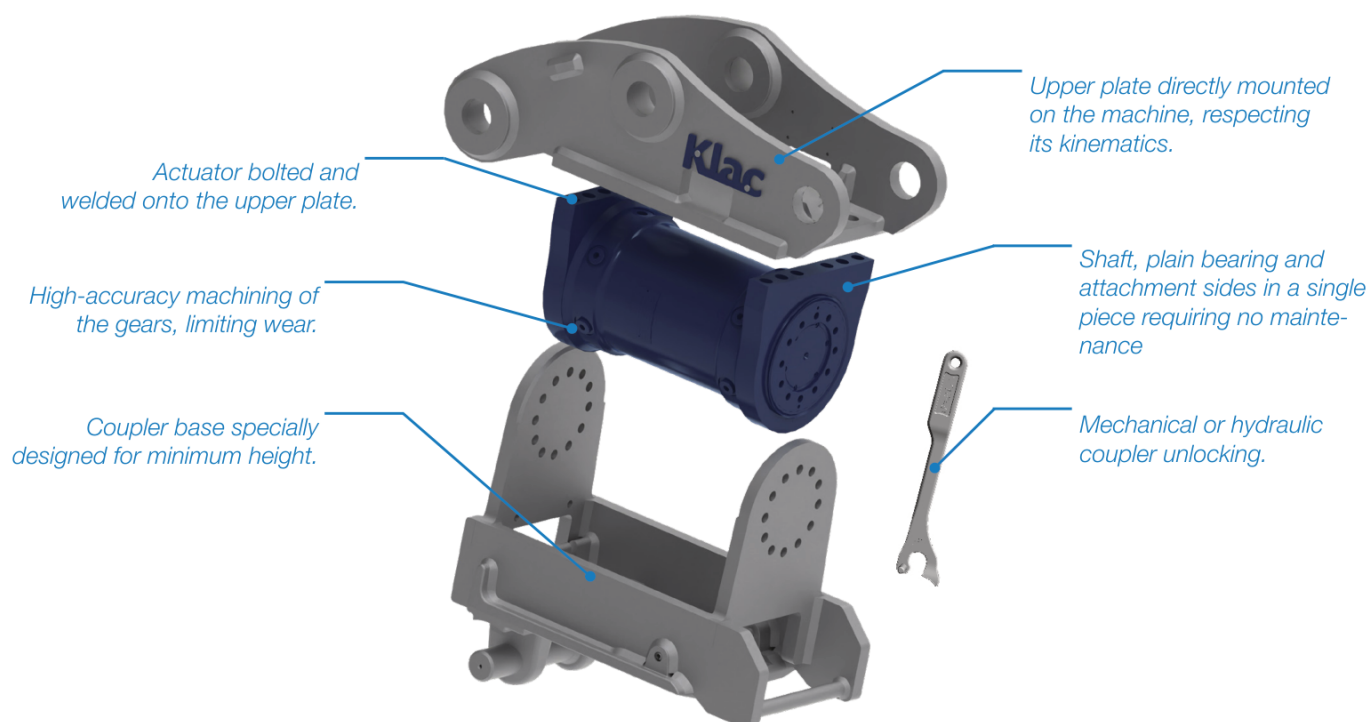

- Compact solution
- 180° tilt
- Easy work with narrow accessories
- Enables multiple work positions
- Accuracy, power and longevity
- Optimised quick coupler for perfect compatibility

STUNNING OPERATION

A simple, compact solution which is in the Klac Industrie DNA, offering you the possibility to tilt any accessory up to 2x90° for enhanced versatility.

TECHNICAL FEATURES

FOCUS ON The **actuator**

Robust, reliable and accurate, the actuator is at the heart of the tilt function.

- Protection against wear, tear-out and rust thanks to its special manufacturing process and surface treatment.
- It is centred, for optimum power distribution.
- Very high precision manufacture of the inner gear.

The deflectors on each side prevent dirt from entering the unit, thus reducing maintenance costs.

SAFETY QUESTION

The TiltK Klac **system** remains first and foremost a simple, compact quickconnect coupler which is safe to use.

 It satisfies all the required conditions for the connection system and the locking system.

Klac **system** has a mechanical connection and locking system.

The coupler remains locked in all circumstances.

 2 x 90°
