Hydraulic rotator FHH 16 designed for heavy duty machinery to meet the highest demands for quality and reliability. Ideal for intensive professional use in forestry, general cargo and material handling.

Rotator's upper mount is applied in FORK form factor of the knuckle joint. Robust and tough built to withstand even overloads. The fork width (between fork ends) is common standard width 100mm and the knuckle pin diameter 45mm.

Rotator lower mount is applied in FLANGE form factor to mount direct on grapple / tool surface by fixing with screws
